MPD Copper-Gold Project
Southern British Columbia

Mohave Copper-Molybdenum-Silver Project, Arizona

Why Invest in Kodiak Copper Now?

Focused on **effective, responsible copper exploration** – critical metal for the energy transition and AI, supply deficit looming due to the lack of new discoveries

Management team with strong track record, member of well-respected Discovery Group – founder and chairman Chris Taylor generated \$2bn for shareholders with sister company Great Bear

Projects in **existing mining districts in North America** – low risk, low cost regions with excellent **infrastructure** where mines can be permitted and built

Kodiak outlined **major porphyry district at MPD copper-gold project in Southern British Columbia** – achieved critical mass through consolidation and large drill campaigns (~90,000m)

Initial resource estimate and positive metallurgical test results in 2025 – successful milestones in the **de-risking of the project**, laying the foundation for **future economic development** potential

Significant opportunity for resource growth and additional discoveries – all resource zones open for extension and ~20 additional target areas on property

Solid capital structure – \$8M cash, 95.9M shares outstanding, largest shareholder is Konwave AG
